The completely flat shower tray

**butech**  
PORCELANOSA Grupo

# shower-deck

New concept shower tray with hidden drain for the most exclusive bathrooms. This new shower-tray system creates a sense of continuity with the rest of the bathroom floor because the slopes are hidden under the floor. Drainage is achieved through open joints and does not require a drainage grille.

The **shower deck** system is a shower consisting of a polyurethane base coated with thermostable polymer, ready for ceramic tiles without any need for adhesive. Especially recommended for bathroom refurbishments.

# **shower-deck**

## TECHNICAL INFO

### Main characteristics

- Flat shower tray without slopes.
- Polyurethane coated with thermostable polymers.
- Sump drain hidden from view.
- Ultrathin shower tray; only 30 mm high.
- Easy cleaning and high resistance to household detergents.
- Virtually zero maintenance, especially in comparison with wooden flooring.
- Thermal insulation.
- Easy installation and assembly.

### Recommended uses

- Shower trays and cubicles for all types of bathrooms.
- Shower trays for private and public use.
- Bathrooms adapted for people with reduced mobility.
- Bathrooms for the disabled.

# shower-deck TRAY COMPONENTS

1. Shower tray Shower deck. Thickness: 30 mm
2. Shower drain. Height 60 mm. Output  $\varnothing$  40mm and 0.5 l/s
3. **lamiband 200**
4. Profile guides for floor tiles
5. **p-404**
6. Protection plate
7. Lifting tool
8. Profile guides for wall tiles

# shower-deck SELECTING THE SHOWER TRAY

Lateral shower head less than or equal to 35 cm

Recommended **shower deck**: 800 x 938mm, 900 x 938mm or 1216 x 938mm

Lateral shower r head equal to or greater than 35 cm

Recommended **shower deck**: 1216 x 938mm

## Central shower head less than or equal to 35 cm

Recommended **shower deck**: 1216 x 938mm

## Shower tray selection criteria

The measure of the **shower deck** does not have to exactly match the area of the tray, should only coincide with the area of drainage, where the water falls. Therefore the shower tray will depend on the type of rain/head/hand shower.

**Extension of the drainage area:** in bathroom renovation, when the drainage area is slightly larger than an available shower deck reference, tiles on the **shower deck** can be combined with a ceramic perimeter fixed to the substrate. In this case, it is recommended to fix the ceramic with a slight slope of 0.5%.

## Technical details

# shower-deck HOW TO PLACE AN ORDER

Information needed to place a **shower-deck** order:

- Shower tray length (mm): maximum length 3000 mm
- Shower tray width (mm): maximum width 1500 mm
- Sump Position. Recommended distance to either side: 300 mm

The **shower-deck** kit includes a horizontal drain with non-return valve. When a different drain is needed, use one of the following references:

- |           |  |
|-----------|--|
| 250045810 | Horizontal SWD drain with standard valve |
| 250049540 | Vertical SWD drain with standard valve   |
| 250049695 | High flow SWD drain + non-return valve   |
